### **Israeli rockets!**

Devastation, death and misery are the result of Israeli and Islamic rockets. They are the two poles of the International state and political Islamic terrorism. They have waged a war against the people of the region.

Israeli government with the backing of the Western governments specifically USA and Britain have for many decades denied the right of the Palestinian people their territory and independent state.

The political Islam, Hizbullah forces backed by Islamic Republic of Iran have created massacres against the people in the region.

Both poles are condemned. Protesting against one should not lead to support of the other. The only way forward is:

**An immediate end to the war in the Middle East**
