

## Long Live May Day!

No to War, No to Islamic Republic, Long Live Socialism!

May 1<sup>st</sup> is the solidarity day of the working class in order to change the upside down capitalist world. At present, when the “New World Order” is facing a dead end, in a world where the lives and rights of people are smashed by the war for power between political Islamist terrorism and the state terrorism of the West, May Day should be the day of solidarity of the workers and libertarian humans against these two reactionary poles and towards forming a better world.
